excerpt from how to study effectively not long ago i was asked by a group of high school students to present to them some suggestions on the technique of studying with the idea

that better knowledge of the methods by which school work could be prepared might increase their efficiency as students a survey of the available literature seemed to warrant the conclusion that despite the existence of a number of books upon the art of study there was still room for another treatment that should be limited to the direct laying down of a series of rules or maxims with just sufficient explanatory comment to make them readily intelligible and serviceable for the needs of the average high school or college student i judge that many students in our high schools and colleges are not now working under the best possible conditions and that they would be glad to increase their efficiency if only they knew how to do it the rules which follow are intended to help these students most of the suggestions could also be profitably kept in mind by elementary school teachers whose business it should be as early as possible to develop right habits of study in their pupils about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
